

## Technical Specifications

### WaterWorld Charger 35 A - 48 Volt

Specifications of the WaterWorld 35 Ampere battery charger are given below. For more information visit: [www.ww-el.com](http://www.ww-el.com)

General Information	
Max charge current	35 Ampere
Max charge power	2000 Watt
Max input current	12 Ampere at 230 AC
Final load Voltage	56.8 Volt
Cooling	Air cooled
Weight	3.8 kg
Dimensions (LxWxH)	282 mm x 168 mm x 90 mm
Exclusive us for battery chemistry:	Lithium Iron Phosphate (LFP) LiFePO4

Use Information	
Efficiency	>95%
Intake voltage AC	90-265 Volt
Plug intake	Type F, European standard
Cable length intake	140 cm
Plug output	Anderson SB50
Cable length output	120 cm
IP rating	IP66
Warranty	2 Jaar

Protection	
Overvoltage protection	Yes
Overcurrent protection	Yes
Overtemperature protection of charger	Yes
Reverse polarity protection	Yes
